Encyclopedia of Immunotoxicology - Springer

Immunotoxicology. Immunotoxicology is a relatively new discipline, the purpose of which is to detect and characterize the potentially adverse immunomodulatory effects of xenobiotics and pharmaceuticals in the context of toxicological hazard identification and risk assessment.

Immunotoxicology - an overview | ScienceDirect Topics

Immunotoxicology therefore focuses on the undesirable effects of chemicals on the immune system. The exposure of humans or animals to such agents may be intentional (drugs) or unintentional (environment). Since the immune system is a very complex, well-regulated system, its interactions with substances, are as diverse as they are complicated.

Over 200 contributing authors - including ...

Encyclopedia Of Immunotoxicology Download - onlybooks.org

Two mutant strains, in addition to beige mice, have been used in immunotoxicology studies: the 3SCID mouse and the triple mutant 3bg/nu/xid mouse. SCID mice are recombination defective at the variable domain J (3VDJ) region, which results in a non-functional immunoglobulin heavy-chain gene rearrangement and a lack of functional T and B lymphocytes ...
