### **Welcome to DEC | Department of Environmental Conservation**

Environmental Pollution. Environmental pollution has existed for centuries but only started to be significant following the industrial revolution in the 19th century. Pollution occurs when the natural environment cannot destroy an element without creating harm or damage to itself. The elements involved are not produced by nature, and the destroying process can vary from a few days to ...

### **Causes and Effects of Environmental Pollution - Conserve**

Environmental conservation is an umbrella term that defines anything we do to protect our planet and conserve its natural resources so that every living thing can have an improved quality of life. Conservation works in two ways.

### **(PDF) Environmental pollution and waste management**

Environmental protection in Tanzania began during the German occupation of East Africa (1884-1919) when colonial conservation laws for the protection of game and forests were enacted, whereby restrictions were placed upon traditional indigenous activities such as hunting, firewood collecting and cattle grazing.

### **Environmental protection - Wikipedia**

Pollution is the introduction of contaminants into the natural environment that cause adverse change.

Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.
