ACPI key control for USB HID keyboards in Win2K - posted in Suggestions: The reason I downloaded AHK was to disable the sleep and power keys on my keyboard without resorting to removing them with a scalpel. I hoped that, even better, I'd be able to map them to useful functions instead of the current disastrously fatal work-losing ones. It is otherwise completely impossible to disable them in ...

ACPI key control for USB HID keyboards in Win2K

HID devices don't automatically wake up a system from a low- power state. Only specific HID devices (e.g. Top level collections of keyboards and mice) do this. If an end user wishes to disarm a device from waking up the system, the user can specify this via the properties/power management tab in device manager. Feedback

Power management for HID over USB - Windows drivers

HID Mobile Access â€“ access control solutions for use with Keyscan systems. Inside HID Mobile Access HID Globalâ€™s Mobile Access Portal and App enable organizations to efficiently deploy and manage mobile users with confidence and delivers a dynamic mobile solution. â€¢ HID Mobile will function on all Keyscan systems utilizing:

Keyscan Access Control Systems Product Guide

Up to eight paired link keys are stored in FIFO fashion. Upon power up, the module tries to connect to the most recently paired device. If it is not found, the module attempts to connect to the next N hosts depending upon the settings of bits 2-0 in the HID register. ... Bluetooth HID Profile User Manual
