Life history theory is an analytical framework designed to study the diversity of life history strategies used by different organisms throughout the world, as well as the causes and results of the variation in their life cycles. It is a theory of biological evolution that seeks to explain aspects of organisms' anatomy and behavior by reference to the way that their life historiesâ€”including ...

During the 17th century, Galileo found that, counter to Aristotle's teachings, all objects tend to accelerate equally when falling. The relation of the distance of objects in free fall to the square of the time taken was confirmed by Grimaldi and Riccioli between 1640 and 1650. They also made a calculation of the gravitational constant by recording the oscillations of a pendulum.

In recent years, the Business History Conference has sprouted several interest groups that have coalesced around perceived needs. The first two, "Women in Business History" and "Business Historians at Business Schools," meet informally over lunch at the annual meeting to discuss issues in the profession and to network. The "Emerging Scholars" group began informally, but its leadership now ...

The History Manifesto is a call to arms to historians and everyone interested in the role of history in contemporary society. Leading historians David Armitage and Jo Guldi identify a recent shift back to longer-term narratives, following many decades of increasing specialization, which they argue is vital for the future of historical scholarship and how it is communicated.
